## TAYLOR RANCH URANIUM PROJECT – DRILLING PERMIT CONDITIONS FINALISED

Black Range Minerals Limited (ASX: BLR and the “Company”) is pleased to advise that the Fremont County’s Board of Commissioners has finalised and today voted unanimously (3-0) to approve conditions for the Company’s permit to conduct further exploration drilling activities at its 100% owned Taylor Ranch Uranium Project in Colorado, USA.

Fremont County has awarded the Company a permit to conduct exploration at the Taylor Ranch Uranium Project for an eight (8) year term. The Company may resume exploration drilling immediately, providing it complies with a series of conditions imposed to ensure that the Company minimises local disturbances and implements best practices throughout its exploration activities. The Company believes that all of the conditions imposed are very reasonable and that it will be able to efficiently and effectively explore the Taylor Ranch Uranium Project.

Preparations are being made to resume drilling at the Taylor Ranch Uranium Project by early August.
